SUBJECT INDEX

A

- Abuse, *see also specific types*
 - collaboration with certified nurse midwives to care for pregnant women with history of, 229-234
 - experiences of psychiatric nurses at private hospitals during fraud and, 197-206
 - of troubled youths in a shelter, 41-48
 - repressed memory and false memory, 110-115
- Admission, hospital
 - patients' experience of a planned admission program, 207-213
- Adolescents
 - characteristics of troubled youths in a shelter, 41-48
- Adult offspring caregivers
 - sense of relatedness and interpersonal network of, 85-95
- Advanced practice nurses
 - casuistry in choosing a framework for ethical analysis, 16-23
 - collaboration with certified nurse midwives to care for pregnant women with history of abuse, 229-234
- Advocacy
 - for nurses as well as patients, 327
- Affect instability
 - in adults with borderline personality disorder, 32-40
- Alcohol abuse
 - characteristics of troubled youth in a shelter, 41-48
 - internal and external environment of schizophrenics during, 136-142
 - nurses referred to peer assistance program for, 319-324
- American Nurses' Association
 - centennial of, 263-264
- Americans with Disabilities Act
 - psychiatric nurses' knowledge of, 328-334
- Anorexia nervosa
 - self-schema model as theoretical approach to self-concept in, 96-109
- Antidepressants
 - recent advances in pharmacotherapy of major depression, 355-364
 - cytochrome P₄₅₀, 360-361
 - development of, 356
 - dose and dose-response curve, 361-362
 - efficacy of, 356-357
 - implications for psychiatric nursing, 362-363
 - pharmacodynamics and pharmacokinetics, 358-360
 - receptor blockade and side effects, 358
 - selection, 357-358
- Anxiety
 - caffeine's effect on persons with, 119
 - patients' perceptions of psychiatric nurses, 149
- Archives of Psychiatric Nursing*
 - tenth anniversary of, 263-264
- Assault, of staff by patient
 - psychiatric nursing staff's beliefs and concerns about, 365-373
- Avoidance
 - patients' perceptions of psychiatric nurses, 149

B

- Belonging, sense of
 - indicators of social and psychological functioning and, 235-244
- Bipolar disorder
 - caffeine's effect on persons with, 120
- Body image distortions
 - and self-concept in eating disorders, 98-99
- Borderline personality disorder
 - affect instability in adults with, 32-40
- Bulimia nervosa
 - self-schema model as theoretical approach to self-concept in, 96-109
- Burden, caregiver
 - association between objective and subjective, 77-84
 - in families of psychiatric patients, 67-76

C

- Caffeine
 - effect on persons with mental disorders, 116-122
 - assessment, 120-121
 - caffeine intoxication and differential diagnoses, 120
 - content, 118
 - in anxiety and panic disorder, 119
 - in bipolar disorder, 120
 - in depression, 119
 - in schizophrenia, 118-119
 - pharmacology review, 117
 - withdrawal, 121
- Canada
 - psychiatric nurses' beliefs and concerns about work safety and patient assault, 365-373
- Caregiver burden
 - association between objective and subjective, 77-84
 - research on families of psychiatric patients, 67-76
- Caregivers
 - including informal caregivers in managed care, 195-196
 - sense of relatedness and interpersonal network of adult offspring caring for parent(s), 85-95
- Caring
 - patients' perceptions of psychiatric nurses, 148
- Case management
 - of mentally ill mothers of young children, 49-54
- Casuistry
 - choosing a framework for ethical analysis in advanced practice, 16-23
 - analysis, 20
 - cases study, 19-20
 - concepts of, 18-19
 - versus principlism, 16-18
- Certified nurse midwives
 - collaboration with to care for pregnant women with history of abuse, 229-234
- Change
 - risks of not dealing with, 128-129

- Child abuse, adult survivors of
 - collaboration with nurse-midwives to care for pregnant, 229-234
 - delayed recall of, 342-346
 - feminist nursing perspective on mother's role in father-daughter incest, 252-260
 - healing from incest by resurrecting the buried self, 304-310
 - psychiatric nurses' attitudes toward, 184-191
 - psychiatric nurses' responsibilities to, 342-346
 - repressed memory and false memory, 110-115
 - serial self-portrait to monitor changes in self-concept, 311-318
- Childhood trauma
 - and repressed memory, 111
- Children
 - characteristics of troubled youths in a shelter, 41-48
 - identification and treatment of mental health problems by primary care providers, 293-303
 - management of mentally ill mothers of young, 49-54
- Clinical nurse specialist
 - as case manager for mentally ill mothers with young children, 50
- Cognitive theory
 - in treatment of delusions of schizophrenia, 335-341
- Collaboration
 - with certified nurse midwives to care for pregnant women with history of abuse, 229-234
- Computers
 - perfect writing machine, 65-66
- Concept analysis
 - of panic, 265-275
 - of resilience, 276-282
- Coping
 - strengths of families coping with serious mental illness, 214-220
- Coping skills
 - of families of psychiatric patients, 71-73
- Corporate-owned psychiatric hospitals
 - experiences of psychiatric nurses employed during hospital fraud and abuse, 197-206
- Crisis
 - linkage with sense of relatedness in adult offspring caregivers, 85-95
- Custodialism
 - patients' perceptions of psychiatric nurses, 147
- Cytochrome P₄₅₀
 - role in pharmacotherapy of major depression, 360-361

D

- Delayed recall, of childhood sexual abuse
 - psychiatric nurses' responsibilities to clients, 342-346
- Delusions
 - cognitive theory in treatment of in schizophrenia, 335-341
- Denial
 - patients' perceptions of psychiatric nurses, 148-149
- Depression
 - caffeine's effect on persons with, 119
 - nursing practice paradigm for rural women with, 283-292

- pattern integrations in young women with, 151-156, 157-164
 - case illustration, 163
 - clinical application, 160-163
 - development of pattern integrations, 153-155
 - interpersonal theory of Peplau, 152
 - interpersonal relations and self-system, 153
 - recent advances in pharmacotherapy of major, 355-364
 - understanding and helping depressed women, 165-175
- Disability
 - psychiatric nurses' knowledge of the Americans with Disabilities Act, 328-334
- Drawing
 - using serial self-portraits to monitor changes in self-concept, 311-318
- Drug abuse
 - characteristics of troubled youth in a shelter, 41-48
 - internal and external environment of schizophrenics during, 136-142
 - nurses referred to peer assistance program for, 319-324

E

- Eating disorders
 - self-schema model as theoretical approach to self-concept in, 96-109
- Education, nursing
 - transformation of students' perceptions of mental illness, 347-354
- Elderly patients
 - transcendence and meaning of great-grandmothering, 245-251
- Emotional arousal
 - linkage with sense of relatedness in adult offspring caregivers, 85-95
- Empathy, lack of
 - patients' perceptions of psychiatric nurses, 148
- Enforcement, of rules
 - patients' perceptions of psychiatric nurses, 147
- Environment
 - internal and external, of schizophrenics during drug and alcohol use, 136-142
- Ethical analysis
 - using casuistry to choose framework for in advanced practice settings, 16-23
- Ethical issues
 - psychiatric nursing amid private hospital fraud and abuse, 197-206
- External environment
 - of schizophrenics during alcohol and drug use, 138-142

F

- Fagin, Claire
 - views on psychiatric-mental health nursing as both fundamental and special, 7-8
 - commentary by, 11-13

- False memory
 - and repressed memory, 110-115
 - construction of, 113-114
 - interventions, 114
 - profiles of patients with, 113
 - profiles of therapists of patients with, 113
 - versus repressed memory, 114
 - psychiatric nurses' responsibilities to clients, 342-346
- Family(ies), of psychiatric patients
 - association between objective and subjective caregiver burden, 77-84
 - critical review and future research directions, 67-76
 - coping, 71-73
 - current research on family burden, 69-71
 - historical perspective on impact, 68-69
 - interpretive research, 73-74
 - including informal caregivers in managed care, 195-196
 - strengths in coping with serious mental illness, 214-220
- Feminist perspective
 - on mother's role in father-daughter incest, 252-260
- Filial caregiving
 - sense of relatedness and interpersonal network of adult offspring caregivers, 85-95
- Fluoxetine (Prozac)
 - in pharmacotherapy of major depression, 355-364
- Fraud, hospital
 - experiences of psychiatric nurses during, 197-206
- Friendliness
 - patients' perceptions of psychiatric nurses, 148

G

- Grandparents
 - transcendence and meaning of great-grandmothering, 245-251
- Great-grandmothering
 - transcendence and meaning of, 245-251
- Group process
 - development of tool to measure therapeutic factors in, 221-228

H

- Healing
 - from incest by resurrecting the buried self, 304-310
- Health, perceived
 - linkage with sense of relatedness in adult offspring caregivers, 85-95
- History of nursing
 - views on psychiatric-mental health nursing as both fundamental and special, 3-10
 - commentaries, 11-13, 14-15
- Home care, psychiatric
 - patients' perceptions of, 176-183
- Hospitalization
 - patients' experience of a planned admission program, 207-213

- reduction of in seriously mentally ill mothers of young children, 49-54
- Hospitals, psychiatric, for-profit
 - experiences of psychiatric nurses employed at during hospital fraud and abuse, 197-206

I

- Identity disturbance
 - and self-concept in eating disorders, 97-98
- Incest
 - feminist nursing perspective on mother's role in father-daughter, 252-260
 - healing from by resurrecting the buried self, 304-310
 - psychiatric nurses' attitudes toward, 184-191
- Interactions, nurse-patient
 - patients' internal world experience of, 143-150
- Internal environment
 - of schizophrenics during alcohol and drug use, 136-142
- Interpersonal network
 - of adult offspring caregivers, 85-95
- Interpersonal relations
 - pattern integrations in young depressed women, 151-156, 157-164
- Interpretive research
 - on families of psychiatric patients, 73-74
- Intersubjectivity
 - in support group for nurses, 374-378
- Intimacy, lack of
 - patients' perceptions of psychiatric nurses, 147-148

L

- Life history approach
 - to research on severe mental illness, 24-31
- Long-term follow-up
 - life history approach with severely mentally ill patients, 24-31

M

- Major depressive disorder, *see also* Depression
 - nursing practice paradigm for depressed rural women, 283-292
- Managed care
 - in the public interest, 1-2
 - including the informal caregiver in, 195-196
- Memory
 - repressed and false, 110-115
- Mental health nursing, *see* Psychiatric-mental health nursing
- Mental health problems
 - identification and treatment of in children by primary care providers, 293-303
- Mental illness
 - serious

- life history approach to experience of, 24-32
- management of mentally ill mothers of young children, 49-54
 - strength of families coping with, 214-220
- transformation of nursing students' perceptions of, 347-354
- Mereness, Dorothy
 - views on psychiatric-mental health nursing as both fundamental and special, 5-7
- Midwives, certified nurse
 - collaboration with to care for pregnant women with history of abuse, 229-234
- Mothers
 - collaboration with certified nurse midwives for care of pregnant women with history of abuse, 229-234
 - feminist nursing perspective on role in father-daughter incest, 252-260
 - management and care of mentally ill mothers of young children, 49-54
 - adapting to motherhood, 50-51
 - interventions, 51-53
 - program development, 51
 - role of clinical nurse specialist, 50

N

- Nefazodone (Serzone)
 - in pharmacotherapy of major depression, 355-364
- Nurses
 - referred to peer assistance program for alcohol and drug problems, 319-324
- Nurses, psychiatric
 - attitudes toward sexuality, sexual assault/rape, and incest, 184-191
 - beliefs and concerns about work safety and patient assault, 365-373
 - collaboration with certified nurse midwives to care for pregnant women with history of abuse, 229-234
 - employed at private hospitals during fraud and abuse, 197-206
 - knowledge of Americans with Disabilities Act, 328-334
 - patients' internal world experience of interacting with, 143-150
 - responsibility to clients with delayed recall of childhood sexual abuse, 342-346
- Nurse-patient interaction
 - patients' internal world experience with, 143-150

O

- Object relations
 - of persons experiencing psychosis, 129-135
 - containment, 131
 - internalization of relationships, 130
 - projective identification, 130-131
- Oklahoma City bombing
 - exacerbation of symptoms in veterans with PTSD, 55-59

- Outcomes
 - as focus for practice and research, 1-2

P

- Panic
 - concept analysis of, 265-275
- Panic disorder
 - caffeine's effect on persons with, 119
- Paranoid phenomena
 - object relations and nursing care of people experiencing psychosis and, 131-132
- Parents, *see also* Mothers
 - sense of relatedness and interpersonal network of adult offspring caregivers, 85-95
- Parenting
 - management of seriously mentally ill mothers of young children, 49-54
- Paroxetine (Paxil)
 - in pharmacotherapy of major depression, 355-364
- Pattern integrations
 - in young depressed women, 151-156, 157-164
 - alternating form, 160
 - antagonistic form, 160
 - case study, 163
 - clinical application, 160-163
 - complementary form, 158-159
 - development of, 153-155
 - mutual form, 159
- Peplau, Hildegard
 - pattern integration in young depressed women based on interpersonal theory of, 151-156, 157-164
 - views on psychiatric-mental health nursing as both fundamental and special, 4-5
 - commentary by, 14-15
- Pharmacology
 - of caffeine, 117
- Pharmacotherapy
 - recent advances in major depression, 355-364
 - cytochrome P₄₅₀, 360-361
 - development of, 356
 - dose and dose-response curve, 361-362
 - efficacy of, 356-357
 - implications for psychiatric nursing, 362-363
 - pharmacodynamics and pharmacokinetics, 358-360
 - receptor blockade and side effects, 358
 - selection, 357-358
- Physical abuse
 - characteristics of troubled youth in a shelter, 41-48
- Planned admission program
 - patients' experience of a, 207-213
- Postpartum panic disorder
 - and concept analysis of panic, 265-275
- Posttraumatic stress disorder
 - exacerbation of symptoms in veterans after Oklahoma City bombing, 55-59
 - imagery, classical conditioning, and memory, 55-56
 - memory and meaning, 56-57
 - reexperiencing symptoms, 57-59

- Pregnant patients
 - collaboration with certified nurse midwives to care for if history of abuse, 229-234
 - postpartum panic disorder, 265-275
- Primary care providers
 - identification and treatment of children's mental health problems by, 293-303
- Principlism
 - versus casuistry as framework for ethical analysis, 16-23
- Private psychiatric hospitals
 - nurses' experiences during fraud and abuse at, 197-206
- Psychiatric home care
 - patients' perceptions of, 176-183
- Psychiatric hospitals
 - experiences of nurses during fraud and abuse at private, for-profit, 197-206
- Psychiatric nurses
 - attitudes toward sexuality, sexual assault/rape, and incest, 184-191
 - beliefs and concerns about work safety and patient assault, 365-373
 - collaboration with certified nurse midwives to care for pregnant women with history of abuse, 229-234
 - employed at private hospitals during fraud and abuse, 197-200
 - knowledge of Americans with Disabilities Act, 328-334
 - patients' internal world experience of interacting with, 143-150
 - responsibilities to clients with delayed recall of childhood sexual abuse, 342-346
- Psychiatric-mental health nursing
 - and object relations in persons experiencing psychosis, 129-135
 - views on dilemma of being both fundamental and special, 3-10
 - commentaries, 11-13, 14-15
 - Fagin, 7-8, 11-13
 - Mereness, 5-7
 - Peplau, 4-5, 14-15
- Psychological functioning
 - sense of belonging and indicators of, 235-244
- Psychosis
 - object relations and nursing care of persons experiencing, 129-135

R

- Rape
 - psychiatric nurses' attitudes toward, 184-191
- Reimbursement
 - for informal caregivers from managed care system, 196
- Relatedness
 - sense of in adult offspring caregivers, 85-95
- Repressed memory, 110-115
 - childhood trauma, 111
 - delayed recall, 112
 - effect of current life on memory, 111
 - false memory, 112
 - construction of, 113-114

- profiles of patients with, 113
 - profiles of therapists of patients with, 113
 - incidence of, 110-111
 - interventions, 114
 - memories as reduced and crystallized patterns, 111-112
 - psychiatric nurses' responsibilities to clients, 342-346
- Research
 - in the public interest, 1-2
 - life history approach to severe mental illness, 24-31
 - on families of psychiatric patients, 67-76
- Resilience
 - concept analysis of, 276-282
- Respite care
 - for informal caregivers under managed care, 195-196
- Runaway youths
 - characteristics of in a shelter, 41-48
- Rural areas
 - nursing practice paradigm for depressed rural women, 283-292

S

- Safety, work
 - psychiatric nurses' beliefs and concerns about, 365-373
- Schizophrenia
 - caffeine's effect on persons with, 118-119
 - cognitive theory applied to treatment of delusions of, 335-341
 - internal and external environment during alcohol and drug use, 136-142
- Self-concept
 - monitoring changes in using serial self-portraits, 311-318
 - self-schema model as theoretical approach to in eating disorders, 96-109
- Self-esteem disturbances
 - and self-concept in eating disorders, 99-100
- Self-portraits
 - monitoring changes in self-concept using serial, 311-318
- Self-schema model
 - theoretical approach to self-concept in eating disorders, 96-109
- Serious mental illness
 - life history approach to experience of, 24-31
 - management of mentally ill mothers of young children, 49-54
 - strengths of families coping with, 214-220
- Sertraline (Zoloft)
 - in pharmacotherapy of major depression, 355-364
- Sexual abuse, *see also* Incest
 - adult survivors of childhood
 - collaboration with certified nurse midwives for care of pregnant, 229-234
 - delayed recall of, 342-346
 - healing from incest, 304-310
 - psychiatric nurses' responsibility to, 342-346
 - repressed memory and false memory, 110-115
 - serial self-portrait to monitor changes in self-concept, 311-318
 - characteristics of troubled youth in a shelter, 41-48
- Sexual assault
 - psychiatric nurses' attitudes toward, 184-191

Sexuality

psychiatric nurses' attitudes toward, 184-191

Shelter, runaway

characteristics of troubled youths in, 41-48

Social functioning

sense of belonging and indicators of, 235-244

Social microcosm

in support group for nurses, 374-378

South Africa

psychiatric nurses' beliefs and concerns about work safety and patient assault, 365-373

Strengths

of families coping with serious mental illness, 214-220

Stress

in families of psychiatric patients, 67-76

Students, nursing

transformation of perceptions of mental illness, 347-354

Substance abuse

internal and external environment of schizophrenics during, 136-142

nurses referred to peer assistance program for, 319-324

Support groups, for nurses

intersubjectivity and social microcosm in, 374-378

T

Technology

perfect writing machine, 65-66

Therapeutic Group Interaction Factors Scale

development of, 221-228

Therapists

and false memory syndrome, 113

Transcendence

meaning of great-grandmothering, 245-251

Trauma, childhood

and repressed memory, 111

U

Undergraduate nursing students

transformation of perceptions of mental illness, 347-354

United Kingdom

psychiatric nurses' beliefs and concerns about work safety and patient assault, 365-373

United States

psychiatric nurses' beliefs and concerns about work safety and patient assault, 365-373

V

Venlafaxine (Effexor)

in pharmacotherapy of major depression, 355-364

Veterans, military

exacerbation of PTSD after Oklahoma City bombing, 55-59

W

Women

healing from incest by resurrecting the buried self, 304-310

nursing practice paradigm for depressed rural, 283-292

pattern integration in depressed young, 151-156, 157-164

understanding and helping depressed, 165-175

Work safety

psychiatric nursing staff's beliefs and concerns about, 365-373

Writing

perfect writing machine, 65-66
